

UIECC - GLOBAL EDUCATION INITIATIVE IN PARTNERSHIP WITH JAGORA UNIVERSITY & KL UNIVERSITY

MASTER - MBA DATA SCIENCE

PROGRAM OVERVIEW

The UIECC-Jagora-KL University Master-MBA in Data Science is a two-year post-graduate degree that deals with obtaining, collecting, interpreting, and analyzing data for the benefit of a company or organization and to stop losses. It enhances analytical and management skills.

WHY SHOULD ONE STUDY MBA IN DATA SCIENCE WITH UIECC-JAGORA-KL UNIVERSITY?

It's the best way to study UIECC-JU-KLU Master-MBA in Data Science. Easy accessibility, flexibility, geographic flexibility and above all time saving makes online education attractive. One can earn while pursuing the course and break the hurdles of the superb career.

Throughout the course of the study, the students will realise multiple community projects that will help develop their employability skills such as:

- Problem-Solving and Decision-making Skills
- Task-Related Skills
- Personal Values
- Relations with Other People
- Communication Skills
- Maturity
- Health and Safety Habits
- Commitment to Job

KEY HIGHLIGHTS:

- Study while Earning
- In-Demand Specialization
- Placement Support
- Elite Instruction
- NAAC – A ++ Grade in India

ELIGIBILITY CRITERIA:

Graduates in any discipline are eligible for this course.

PROGRAM DURATION:

Online MBA in Data Science is a 2-year post graduate program with 4 semesters.

PROGRAM BENEFITS:

- **Worldwide Career Scope:** As someone with a degree in this field knows to anticipate potential dangers in the future and turn them into profits, there are many opportunities for employment, growth, and advancement in various nations.
- **High Untapped Opportunities:** Since this field is more recent, there is more room for professional growth and demand, but there aren't enough qualified people to fill these vacancies, so this course is quite profitable.
- **Critical for Company Growth:** To continuously evaluate their strengths and weaknesses, a Master-MBA in Data Science degree holder comes in handy and can make strategic decisions that support their growth goals.
- **Hone Skills to Predict Risk:** Skills like obtaining, collecting, interpreting, analyzing, and concluding data are some of the skills which are sharpened during this course.
- **Skills to Develop Strategies:** A master in Data Science develops the abilities needed to create market strategies that will benefit the business or organization.

CAREER OPTIONS:

- **Data Analytical Officer:** A Data Analytical Officer works with the available data to plan, carry out, and evaluate surveys and data dashboards. They also manipulate, analyze, and interpret massive amounts of data.
- **Data Engineer:** A data engineer collects, arranges, and processes data in order to develop solutions that Data Scientists and Business Analysts may use.
- **Business Analyst:** Business analysts carefully examine and dissect data to create models that reveal trends, offer insightful information, and promote the expansion of a business.
- **Research Analyst:** The career scope for a Research Analyst is researching, analyzing, interpreting, and presenting data related to markets for the company's growth and profit.
- **Data Scientist:** To make data-driven decisions and assess market trends for the benefit of businesses and industries, a data scientist must comprehend and interpret data.

COURSE CURRICULUM

SEMESTER WISE COURSES

SEMESTER I

- Essentials of Management
- Probability & Statistics
- Mathematics for Data Science
- Statistics for Data Science- I
- Business Research Methodology
- Introduction to Python Programming

SEMESTER II

- Foundation in Database Management Systems
- Management Science
- Data Analysis Using NumPy & Pandas
- Data Visualization using Tableau/Python
- Excel for Data Science
- Statistics for Data Science –II
- Project Work

COURSE CURRICULUM

SEMESTER WISE COURSES

SEMESTER III

- Prescriptive Analytics
- Time-Series Analysis
- Machine Learning Using Python
- Elective I* – Marketing Analytics –I
- Elective I – Financial Analytics –I
- Elective I – People Analytics –I
- Elective I – Supply Chain Analytics –I
- Internship – I

SEMESTER IV

- Natural Language Processing –NLP
- Big Data Analysis
- Deep Learning Using Python
- Elective I* – Marketing Analytics –II
- Elective I – Financial Analytics –II
- Elective I – People Analytics –II
- Elective I – Supply Chain Analytics –II
- Internship** – II

* Note: Only One Elective is chosen by the students from 4 offering specializations.

** Within the first 2 months of the semester, four subjects are taught and sent for Internship for the next 2 months in 3rd and 4th semesters.
